

## RHIP and COVID-19 MINI-GRANT PROJECT SUMMARIES

### COVID-19 Final Report for Mosaic Medical (Non-RHIP) “COVID-19 Care Kits for the Homeless”

#### Summary of Results:

- Mosaic was able to purchase cold medicine, thermometers, sanitation wipes and other COVID-19 related items to distribute to homeless individuals who contracted COVID-19.
- We are grateful to have these items on hand for distribution.
- While it was hard to secure these items back in March, we have been able to slowly build our inventory over time and are now able to quickly distribute COVID-19 kits when patients arrive at the mobile clinic with COVID-19 symptoms.

#### Quote

“One patient was so grateful that they didn't have to find a way to get into town to purchase the cold medicine they needed. They were already feeling ill and so having this need met meant they could go rest in their RV and isolate until they were feeling symptom free.”
