

## RHIP and COVID-19 MINI-GRANT PROJECT SUMMARIES

### COVID-19 Final Report for Sparrow Clubs USA (Non-RHIP) "Project Continuation 19/20 and 20/21 School Years"

#### Summary of Results:

- Sparrow Clubs was able to launch a phone app for students to use in communicating with their Sparrow families.
- 268 students registered as users on the app and were able to give and receive communication from their Sparrow families.
- While the number of students was lower than we had hoped, the families and students that were connected by the app received the outcome of compassion and support that we intended.
- We acknowledge that it takes time to market this tool to students, and elementary-aged students may not have access to a phone app.
- The Sparrow phone app can, and will be, used in future school years and will have a much farther outreach.

#### Quotes:

A student from Sisters High School wrote this reflection after participating in her school's Sparrow project:

"It means so much to me to know that one day Liam will be worried about normal kid things like a math test - instead of a blood test. I hope that we have been able to help and made things a little easier for your family".
