

RHIP and COVID-19 MINI-GRANT PROJECT SUMMARIES

RHIP Mini-Grant Final Report for Boost Oregon “Vaccine Toolkits for Healthcare Providers” Reviewed by the Upstream Prevention Workgroup

Summary of Results:

- This project strengthened our support for medical providers.
- We packaged and sent educational materials to local providers and community health organizations for in-house use and distribution to their clients.
- Each toolkit contained 5 “Counseling Vaccine-Hesitant Patients” guides, 8 “Parents’ Guide to Children’s Vaccines” guides, 2 pictorial guides, 15 Vaccine Fact Packs, 30 flu fact sheets and HPV fact sheets, and 10 facts sheets about vaccines for pregnancy.
- Toolkits had materials in both English and Spanish.
- We mailed toolkits and followed up with a survey via email to the contact who received a box to see what resources they were using and giving out.
- Non-response was followed up with a reminder email. Final follow-up was a phone call.
- We were able to distribute 20 vaccine toolkits to clinics and community organizations throughout Central Oregon.
- Boost Oregon will continue to offer these materials (and more) to the public.
- This project enabled us to get resources in the hands of those who will use them and need them most.
- Feedback received was positive and we had some requests for more materials.
- Through this project, community members were able to have access to accurate, easy to understand vaccine information.
